FRAMELESS

Redefining the Experiential Gallery

Official production partner for FRAMELESS, the UK's largest immersive art experience. Cinesite's Immersive team builds entire cinematic worlds — faithful to each artist's original brushstrokes — across four galleries, from Rembrandt and Van Gogh to Dalí and Ernst.

MY ROLE

As XR Coordinator on Cinesite's Immersive team, I ran the day-to-day schedule of managing artists creating the content, supported the live Unreal Engine build at FRAMELESS London — coordinating on-site testing, scheduling and day-to-day communication between engineering and creative teams to keep the rollout on track.

PRINTWORKS MANCHESTER

A Festive, AI-Enabled Christmas Campaign

Turned the ceiling of Printworks shopping centre into Santa's festive stage — a personalised, animated campaign across Europe's largest LED ceiling. With a fraction of a typical VFX budget and a delivery window measured in weeks, the team streamlined a hybrid Generative AI + traditional VFX pipeline.

MY ROLE

As XR Coordinator, managed scoping, budget, scheduling and delivering of the AI-generated content — coordinating data delivery schedules and troubleshooting the localised cache rollout to hit the seasonal deadline.

STORIES — BROUGHT TO LIFE

Cinesite × FRAMELESS × National Portrait Gallery

Production partner for FRAMELESS and the National Portrait Gallery on an immersive experience letting visitors step inside the stories behind some of the UK's most iconic portraits, blending art, technology and human storytelling. First launched May 2025 at MediaCity, Greater Manchester; a limited-run residency opened at FRAMELESS' Central London venue in May 2026.

MY ROLE

As XR Coordinator within Cinesite's Immersive team, supported managing artist schedules and deadlines, live coordination of the Central London residency launch — scheduling on-site checks and liaising between the production and venue teams.

THE SISTINE CHAPEL, REIMAGINED

FRAMELESS London — Launching Summer 2026

Michelangelo's frescoes reimagined at extraordinary scale within The World Around Us gallery — transformed through cinematic visual effects, animation and a powerful original score. God and Adam reach toward one another in The Creation of Adam, sending a bolt of lightning that awakens the surrounding frescoes.

MY ROLE

As XR Coordinator within Cinesite's Immersive team, I managed the scoping, creative management, budgeting, scheduling and driving the project through to delivery as well as managing and coordinating on-site testing and delivery
